Linnworks has been updated so we will now be able to send product option to Linnworks.

You can install the app by clicking this link:

- https://apps.linnworks.net/Authorization/Authorize/8bee3c63-84f3-4ef0-b9f2-7f7658a8103d

- You will be asked to input your Linnworks Username and password to verify the installation.

- Then you need to add Wowcher to your Channel Integrations.

- First email integrations@wowcher.co.uk to get your redemption API credentials and business ID. The link you will receive is only valid for 24 hours and only viewable once. Please make a note of the information you are given.

- One you have received these credentials go back to Linnworks and follow this route:

- Settings>Channel integration>Add new

- A pop up screen will appear, scroll down and find Wowcher and click integrate.

- Give the integration a name (Wowcher makes sense), accept the terms, then add your business ID, API Keys and API secret key

- Enable the channel integration and edit the mapping to the SKUs. (this may need to be done after some orders have flowed in)

- Go to settings>Channel Integration.

- Edit the Wowcher Channel.

- Scroll down to Order:

- Tick the Despatch Notes box.

- Click Save.

- Let us know you are ready to go live. **If you do not let us know that you have completed your integration, we will not set your API to live.**

- If you will be using a Speedy or Express delivery service with Wowcher then you will need to set these up in your Shipping mapping page as shown below. (Linnworks Service can of course be anything)
